Summary

Final-year B.Tech Information Technology student (2026) with hands-on experience in **AI full-stack development** and **computer vision**. Skilled in building scalable web applications using **React, Node.js, MongoDB, and Python**. Proven ability to optimize performance, develop REST APIs, and implement AI-driven features. **GDG On Campus Organizer** leading a 1000+ member technical community.

Technical Skills

- Frontend Development:** React.js, TypeScript, Tailwind CSS, Redux Toolkit, GSAP (Animations), HTML5/CSS3.
- Backend & AI:** Node.js, Express.js, MongoDB, Python (OpenCV, NumPy), Google Genkit AI, RESTful APIs, Java, SQL.
- Key Concepts:** Data Structures & Algorithms, System Design, Git/GitHub, Agile/Scrum.

Experience

- Software Development Intern** Aug 2024 – Sept 2024
Aastrazen Technologies Chennai
- Developed and maintained backend modules using Node.js and Python in collaboration with the engineering team.
 - Refactored legacy code and resolved critical bugs, improving application performance by **15%**.
 - Documented API endpoints and system logic to facilitate easier maintenance and knowledge transfer.

Projects

- Left2Feed - Logistics Platform** Jan 2025 – Present
Social Innovation Firebase, TypeScript, Google Genkit AI, React
- Built a real-time food redistribution platform connecting donors with volunteers to reduce wastage.
 - Integrated **Google Genkit AI** to automate routing logic and matching between stakeholders.
 - Designed a scalable Firebase database schema to manage high-volume concurrent data requests.
- Intelligent Multimodal Interface** Aug 2024 – Dec 2024
Computer Vision Prototype Python, OpenCV, NumPy, MediaPipe
- Developed a hands-free computer control system using real-time gesture recognition.
 - Optimized geometric algorithms using **NumPy** vectorization to ensure low-latency performance.
 - Implemented coordinate mapping to translate hand movements into precise system cursor inputs.
- Personal Portfolio Website** Jan 2026
Interactive Frontend & UI/UX React.js, GSAP, EmailJS
- Developed an immersive, high-performance portfolio featuring complex timeline animations and smooth scrolling using **GSAP**.
 - Integrated **EmailJS** to facilitate serverless contact form handling, ensuring real-time delivery without backend overhead.
 - Designed a responsive, component-based architecture in **React**, optimizing render performance and cross-device compatibility.

Education

- Paavai Engineering College** Namakkal, TN
B.Tech in Information Technology 2022 – 2026 (CGPA-7.4)

Leadership & Achievements

- Organizer, GDG On Campus:** Leading a community of **1000+ developers**; organized technical sessions, workshops, and hackathons.
- Award:** IEI Dr. APJ Abdul Kalam Best Engineering College Student Award (2025).
- Top 4 Finalist:** Secured Top 4 rank out of 50+ teams in PEC Hacks 3.0 for social innovation.
